Profile Summary

Assistant System Engineer with experience in Palo Alto firewall administration, enterprise network security, VPN configuration, traffic analysis, and incident troubleshooting. Skilled in Panorama centralized management, firewall policy deployment, NAT configuration, SSL decryption, VLAN segmentation, routing & switching, and secure enterprise connectivity. Experienced in monitoring enterprise traffic/security logs, threat analysis, and network troubleshooting within security-focused environments.

Core Competencies

Palo Alto Firewalls | Panorama | VPN (IPSec/SSL) | NAT | Firewall Policies | SSL Decryption | Threat Prevention | VLAN Segmentation | TCP/IP | Routing & Switching | Traffic Analysis | Network Security | Incident Troubleshooting | Wireshark | Linux CLI

Work Experience

Assistant System Engineer (Palo Alto Networks) Aug 2024 – Present

IOPEX Technologies

- Administer Palo Alto firewall infrastructure supporting enterprise network security operations and secure connectivity environments.
- Monitor and analyze 5000+ daily traffic/security logs for threat detection, troubleshooting, and network stability monitoring.
- Configure and manage VPNs, NAT policies, SSL decryption, firewall rules, and threat prevention configurations.
- Support Panorama centralized firewall management and policy deployment across enterprise network environments.
- Troubleshoot network security incidents, connectivity issues, and firewall-related service disruptions.
- Work with VLAN segmentation, routing & switching, and secure traffic management for enterprise network support.
- Perform packet capture analysis and network troubleshooting using Wireshark and Linux CLI tools.

Projects

Enterprise Network Segmentation Lab VLAN – Firewall Simulation

- Designed segmented enterprise network architecture using VLAN implementation and firewall-based access control policies.
- Implemented inter-VLAN routing and validated secure-zone communication across 10+ simulated network segments.
- Improved traffic isolation and secure connectivity through firewall filtering and access management techniques.
- Simulated enterprise-level network security architecture for routing, segmentation, and traffic management testing.

Firewall Policy Implementation & Traffic Analysis Lab Palo Alto – Wireshark

- Created and validated Palo Alto firewall policies to inspect, monitor, and secure simulated enterprise traffic flows.
- Verified security rule enforcement using packet capture analysis and Wireshark traffic monitoring tools.
- Configured NAT, VPN connectivity, traffic filtering, and firewall policy management within a lab environment.
- Analyzed network behavior, traffic anomalies, and troubleshooting scenarios using Wireshark and firewall logs.

Technical Skills

Firewall & Security: Palo Alto Firewalls, Panorama, Firewall Policies, VPN (IPSec/SSL), NAT, SSL Decryption, Threat Prevention

Networking: TCP/IP, Routing & Switching, VLAN, Network Segmentation, Enterprise Network Security

Tools: Wireshark, Linux CLI, Jira, Salesforce, Sonic

Programming: Java, SQL

Education

B.Tech in Computer Science Engineering 2020 – 2024

SRM Institute of Science and Technology | CGPA: 9.23

Certifications

- Cybersecurity Apprentice – Palo Alto Networks
- Cybersecurity Practitioner – Palo Alto Networks

Extracurricular

Junior Diploma in Vocal Music 2020 – 2021

Prayag Sangeet Samiti – First Division with Distinction
